**Short description of the project:**

A pressure to provide quality health care with limited resources, population aging, higher patient expectations and a lack of qualified staff call for innovations in health care. Healthcare innovations are urgent in COVID-19 pandemic. The aim of the project is creating the platform for identification of current state and the problems in health care, using of selected modern technologies including mechanisms for start-ups establishing in health care of V4 countries. The use of the best practice from Israel is essential for solving the project. The area for joint projects will be proposed.

**Funding:**

The project is co-financed by the Governments of Czechia, Hungary, Poland and Slovakia through Visegrad Grants from International Visegrad Fund. The mission of the fund is to advance ideas for sustainable regional cooperation in Central Europe.
